Dear Dr. Murphy,

Dear Dr. Schölkopf,

I wish to submit an original research article entitled "Introduction to Statistical Computing in Scala – an Implementation of the K-Nearest Neighbors Classifier" for consideration by Journal of Machine Learning Research.
I confirm that this work is original and has not been published elsewhere, nor is it currently under consideration for publication elsewhere.

In this paper, I show that machine learning in ecology opens new opportunities of research. This is significant because it can bring forward both fields.
I believe that this manuscript is appropriate for publication by JMLR because it advances theoretical studies of practical learning methods.

I have no conflicts of interest to disclose.

If you feel that the manuscript is appropriate for your journal, I suggest the following reviewers: Avi Pfeffer, Neil Lawrence and Saharon Rosset.

Please address all correspondence concerning this manuscript to me at roxana.te@web.de.

Thank you for your consideration of this manuscript.

Sincerely,

Roxana Tesileanu
